## **CARPET CONCEPT**

WOVEN CARPET FOR  
DISTINCTIVE COMMERCIAL,  
HOSPITALITY AND RESIDENTIAL  
PROJECTS

MATERIALS FOR DESIGN

**CARPET CONCEPT**

Carpet Concept make unique carpet.

Woven using flatweave and wilton techniques, each item in the collection has a texture and overall aspect that is different from ordinary carpet.

Their unique character makes them ideal for distinctive interiors, and owing to their particular properties such as high durability and a long service life, the products are perfectly suited for varied applications in the commercial sector.

## LAY, UNO & HEM

A range of three woven wilton carpets. Lay and Uno are available in 72 colours. Individually or combined, the plain Uno and patterned Lay carpet allow for numerous possibilities of floor design.

Hem is a non-directional pattern of dots which are perceived in various ways when viewed from different angles. The 34 colour options are interesting and offer unusual combinations.

## ECO

The Eco collection is a flatwoven carpet, with a three dimensional effect.

The weaving process creates a unique character which is extremely durable, perfectly suited for modern architectural concepts.

## WOOL

We offer two flatwoven options in wool.

Goi is woven from natural wool yarns that are processed without chemical dyeing. Instead, it offers shimmering colours of Shetland and Portland wool in beige and brown. Two structures in plain and stripe designs offer many options for use with a homely feel. Eco Wool is 80% wool and 20% nylon and offers a minimal look with the luxury of wool.

## **GET SPECIFIC**

For individual ranges please see the relevant technical data sheet.  
Wilton woven ranges are supplied as 2m wide carpet.  
Flatwoven ranges are supplied as 4m wide carpet.
