SPECIFICATION

Introduction

Innerspace Cheshire NATUREMOSS panels are suitable for internal use.

Specification

Innerspace Forest Floor

Composition	Real preserved moss (reindeer, bun and flat moss species) fixed to a 9mm Eco-board carrier.
Thickness	Thickness varies with the natural texture of the bark, but is between 25mm and 30mm.
Dimensions	Made to order.
Weight	Approximately 10.00 kg per sq. m.
Suitability	For walls, panels and furniture.

Innerspace Lowland

Composition	Real preserved moss (flat moss species) fixed to a 9mm Eco-board carrier.
Thickness	Thickness varies with the moss, but is between 25mm and 30mm.
Dimensions	Made to order.
Weight	Approximately 10.00 kg per sq. m.
Suitability	For walls, panels and furniture.

Innerspace Foothill

Composition	Real preserved moss (bun moss species) fixed to a 9mm Eco-board carrier.
Thickness	Thickness varies with the moss, but is between 50mm and 60mm.
Dimensions	Made to order.
Weight	Approximately 10.00 Kg per sq. m.
Suitability	For walls, panels and furniture.

Innerspace Landscape

Composition	Real preserved moss (bun and flat moss species) fixed to a 9mm Eco-board carrier.
Thickness	Thickness varies with the moss, but is between 50mm and 60mm.
Dimensions	Made to order.
Weight	Approximately 10.00 Kg per sq. m.
Suitability	For walls, panels and furniture.

Innerspace Rainforest

Composition	Real preserved moss (bun and flat moss species) fixed to a 9mm Eco-board carrier.
Thickness	Thickness varies with the moss, but is between 50mm and 60mm.
Dimensions	Made to order.
Weight	Approximately 10.00 Kg per sq. m.
Suitability	For walls, panels and furniture.

Fire Rating On request, we can use 10mm FR rated ZMDF and a 0 rated fire retardant spray

INSTALLATION

Installation

Moss panels can be fixed from the front with screws or on split battens.

MAINTENANCE

Maintenance

The moss does not require any watering, or any light source.

Generally no maintenance is required.

The moss panels can be lightly brushed over to remove any debris that has settled on them.

Care should be taken to avoid damaging the natural material.

The moss can dry if humidity is very low – restore comfortable humidity levels and the moss will become moist again.

When dry it is vulnerable to damage so try to avoid this.

If the moss is damaged the panels can be repaired. Contact us to organise this

SUSTAINABILITY

Sustainability

All our moss is sourced from sustainable sources where the moss can regrow each growing season.

Our Eco board is carbon negative and has very low VOC and zero formaldehyde emissions.

All our manufacturing is in our workshop in Cheshire, so limited transport impact to site.

We'd love to hear from you...
