# **SPECIFICATION**

## Introduction

Innerspace Cheshire NATUREVERDE walls and planting schemes are suitable for internal use.

All our foliage and flowers are real, and preserved, so no longer living and needing water, sunlight or regular maintenance.

Our walls and planting options are designed to create a real sense of living plants as far as it reasonably practical, celebrating all their natural difference and imperfections, setting us aside from a perfect plastic reproduction.

**Unless specified and agreed at the time of order, Innerspace Cheshire reserves the right to produce its wall and planting schemes using its own artistic interpretation.**

## Specification

Innerspace Jungle, Ivy, and flower wall

|             |   |
|-------------|---|
| Composition | Real preserved foliage and flowers (foliage and flowers may vary) fixed to a 9mm MDF carrier. |
| Thickness   | Thickness varies with the natural texture of the foliage and flowers, but is approx. 60mm.    |
| Dimensions  | Made to order.  |
| Weight      | Approximately 10.00 kg per sq. m.   |
| Suitability | For walls, panels and furniture.  |

# INSTALLATION

## Installation

Foliage and flower panels can be fixed from the front with screws or on split battens.

**MAINTENANCE**

## Maintenance

The foliage and flowers do not require any watering, or any light source.

Generally no maintenance is required.

The foliage and flowers can be lightly brushed over to remove any debris that has settled on them.

Care should be taken to avoid damaging the natural material.

The foliage and flowers can be damaged if humidity is very low or very high – restore comfortable humidity levels as soon as possible to avoid long term damage.

If the foliage or flowers are damaged the panels can be repaired. Contact us to organise this.

**SUSTAINABILITY**

## Sustainability

All our foliage and flowers are sourced from sustainable sources where they can regrow each growing season.

Our MDF has very low VOC and zero formaldehyde emissions.

All our manufacturing is in our own workshop, run on renewable electricity.
